

## 2014 Latest Juniper JN0-101 Exam Dump Free Download!

QUESTION 1 What is the purpose of a network mask? A. It is used to identify the maximum hop count of a subnetwork B. It is used to identify an IP address as either private or public C. It is used to identify the network to which an IP address belongs D. It is used to identify the total number of bits present in an IP address Answer: C  
QUESTION 2 You have been asked to establish reachability between Router 1's and Router 2's loopback addresses as shown in the exhibit. Which two steps will accomplish this task? (Choose two)

A. Create a static route on Router 1 to 172.17.28.1 with a next hop of 10.10.10.2 B. Create a static route on Router 1 to 172.17.28.1 with a next hop of 10.10.10.1 C. Create a static route on Router 2 to 172.17.25.1 with a next hop of 10.10.10.1 D. Create a static route on Router 2 to 172.17.25.1 with a next hop of 10.10.10.2 Answer: AC  
QUESTION 3 Which command displays the amount of space available on the storage media? A. show chassis routing-engine B. show system file-storage C. file list D. show system storage Answer: D  
QUESTION 4 Which statement is true regarding the Junos OS? A. The Junos kernel is based on the Solaris operating system B. The Junos kernel is based on the GNU Zebra operating system C. The Junos kernel is completely original and not based on any other operating system D. The Junos kernel is based on the FreeBSD UNIX operating system Answer: D  
QUESTION 5 Which two login-class permissions could permit a user to view the system hierarchy of the active configuration? (Choose two) A. system permission B. view-configuration permission C. network permission D. super-user permission Answer: AD  
QUESTION 6 What are two reasons why a route might be hidden? (Choose two) A. route preference B. routing loop C. invalid next hop D. routing policy Answer: CD  
QUESTION 7 What is an advantage of multiple software process running in the Junos OS? A. Each process has its own protected memory space B. Each process is started manually by the user at boot C. All processes are dependent on each other D. Multiple processes allow each routing protocol to be independent Answer: A  
QUESTION 8 Which two statements accurately describe a broadcast domain? (Choose two) A. Broadcast domains require that the participating devices connect to common switches or hubs B. Broadcast domains consist of devices reachable by frames addressed to the Layer 2 broadcast address C. Broadcast domains require a gateway device such a router D. Broadcast domains consist of devices that reside on the same VLAN Answer: BD  
QUESTION 9 Which two statements are true regarding an Ethernet collision domain? (Choose two) A. If a switch is used, the collision domain is limited to each device and the switch B. If a hub is used, the collision domain is limited to each device and the hub C. If a hub is used, the collision domain includes all devices connected to the hub D. If a switch is used, the collision domain includes all devices connected to the switch Answer: AC  
QUESTION 10 Referring to the exhibit, which statement is correct? A. The packets have exceeded the time-to-live value B. There is a loop C. The asterisks indicate a response time out D. The asterisks indicate that the traceroute is completed Answer: C  
QUESTION 11 What is an advantage of dynamic routing? A. Unlike static routing, dynamic routing provides redundant IP addresses for end-user devices B. Unlike static routing, dynamic routing requires no initial user configuration C. Dynamic routing can provide increased network availability when compared to static routing D. Dynamic routing provides DNS services along with IP connectivity, static does not Answer: C  
QUESTION 12 Which command do you use to navigate to [edit interfaces] A. cd interfaces B. dir edit interfaces C. edit interfaces D. interfaces Answer: C
