QUESTION 41 Hotspot Question Your company uses Office 365 Small Business. You need to configure the Microsoft Exchange ActiveSync password policy and control the display of presence information. Which two service categories should you configure on the service settings page of the Office 365 admin portal? To answer, select the appropriate service categories in the answer area.

Answer:

QUESTION 42 You are the Office 365 administrator for your company. The company is running Microsoft Exchange Server 2007 with Service Pack 3 on-premises and has 500 mailboxes. Management requests that you migrate all mailboxes to Office 365. You are researching the available migration types. You need to generate a custom step-by-step checklist for multiple migration types. Which tool should you use? A. Exchange Server Deployment Assistant B. Exchange Best Practices Analyzer C. Exchange 2013 Server Role Requirements Calculator D. Microsoft Remote Connectivity Analyzer
Answer: A

QUESTION 43 Your company subscribes to

the Office 365 Enterprise E1 plan. You are the Microsoft Exchange Online administrator. In the last week, employees have reported that they are receiving non-delivery report messages from other companies. The employees have not sent messages to recipients within those companies. You need to prevent non-delivery report messages from reaching employees. Which content filter option should you turn on in the Exchange admin center? A. NDR backscatter B. Conditional Sender ID filtering: hard fail C. SPF record: hard fail D. Block all bulk email messages Answer: D Explanation: It is normal that we turn on NDR filter, but looks like that question is a bit tricky, because it is written that employees did not send messages to those recipients and it is mentioned that many employees are receiving those messages, so in that case could bulk as well because you would get NDR if your email would not be delivered. QUESTION 44 You are the Office 365 administrator for Contoso, Ltd. Some email messages sent from the trusted domain fabrikam.com are being rejected as spam. Some of these email messages originate inside the fabrikam.com network, and some of them originate from an application in the fabrikam.com co-located data center. The fabrikam.com systems administrators have asked you to add their domain and the IP addresses of the data center that hosts their external application to your list of safe senders. You need to configure Microsoft Exchange Online Protection. Which two actions should you perform? Each correct answer presents part of the solution. A. Configure a content filter to allow the fabrikam.com domain. B. Configure a mail flow rule to bypass spam filtering for the data center IP address range. C. Create a connection filter to allow the data center IP address range. D. Add the fabrikam.com domain as an accepted domain. E. Create an inbound connector for the fabrikam.com domain. F. Configure a mail flow rule to bypass spam filtering for the fabrikam.com domain. Answer: CF QUESTION 45 Drag and Drop Question You are an Office 365 specialist for a consulting company. Your company has been hired by several companies to migrate their legacy email solutions to Office 365. You need to recommend mailbox migration strategies for the scenarios described in the following table.

Scenario	Existing system
1	Microsoft Exchange
2	Non-Exchange system

Which strategies should you recommend? To answer, drag the appropriate migration types to the correct targets. Each migration type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

- Cutover migration
- IMAP migration
- Remote move migration
- Staged migration

Answer:

Scenario	Migration type
1	Remote move migration
2	IMAP migration

QUESTION 46 You are the Microsoft Lync administrator for a company that uses Lync Online. The company has mandated that employees may use Lync Online to communicate with contacts from approved external domains. You need to configure Lync Online to allow Lync federation with only three specific domains. You must achieve this goal by using the least amount of administrative effort. Which two actions should you perform? Each correct answer presents part of the solution. A. In the Lync admin center, set the External Access option to On except for blocked domains. B. In the Office 365 admin center, add the three domains to the domain list and set the domain intent for each domain to Lync Online. C. In the Lync admin center, set the External Access option to Off completely. D. In the Lync admin center, set the External Access option to On only for allowed domains. E. In the Lync admin center, configure the Presence Privacy Mode option to display presence information only to the users' contacts. F. In the Lync admin center, add the three domains to the Blocked Or Allowed Domains list. Answer: DF QUESTION 47 Your company is planning to migrate to Microsoft Exchange Online. The company employs 1,000 people, each with a mailbox currently located on Exchange 2010 on-premises. You estimate that it will take a minimum of four weeks to migrate all mailboxes from on-premises Exchange to Exchange Online. The company has the following migration requirements:- During the migration, do not change the existing Microsoft Outlook profiles and .ost files used by the employees.- Ensure that email messages sent between on-premises mailboxes and online mailboxes during the migration are secure.- Do not send email messages between on-premises mailboxes and

online mailboxes over the Internet in plain text. You need to select the migration strategy that meets the requirements. Which migration strategy should you use? A. Cutover migration only B. IMAP migration only C. Remote move migration only D. Staged migration only
Answer: C
QUESTION 48 Drag and Drop Question You are the Office 365 administrator for your company. You have been receiving many unsolicited email messages originating from another country. Many of those messages contain foreign-language content. You need to configure Microsoft Exchange Online Protection to filter messages based on the language content and IP addresses of the country or region of origin. Which filters and options should you configure? To answer, drag the appropriate answer choices to the correct targets. Each answer choice may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

QUESTION 49 Hotspot Question You are the Office 365 administrator for your company. You manage an on-premises Microsoft Exchange Server 2003 environment that has 500 users and an externally-hosted Exchange environment that has 500 users. The hosted Exchange environment does not allow Outlook Anywhere connectivity. You do not have administrative access to all mailboxes in the hosted environment. You plan to migrate and consolidate both environments into Office 365. You have the following migration requirements: - Migrate on-premises mailboxes in batches by department. - Migrate email, calendar, and contact items from the on-premises environment. - Migrate only email from the hosted environment. In the table below, identify the migration type that must be used for each environment. Make only one selection in each column. Each correct selection is worth one point.

On-premises Exchange	Hosted Exchange	Migration type
<input type="radio"/>	<input type="radio"/>	Remote move migration
<input type="radio"/>	<input type="radio"/>	Staged migration
<input type="radio"/>	<input type="radio"/>	Cutover migration
<input type="radio"/>	<input type="radio"/>	IMAP migration

Answer:

On-premises Exchange	Hosted Exchange	Migration type
<input checked="" type="radio"/>	<input checked="" type="radio"/>	Remote move migration
<input checked="" type="radio"/>	<input type="radio"/>	Staged migration
<input type="radio"/>	<input type="radio"/>	Cutover migration
<input type="radio"/>	<input checked="" type="radio"/>	IMAP migration

QUESTION 50 Hotspot Question You are the Office 365 administrator for your company's Microsoft Exchange Online environment. The company recently subscribed to the Office 365 Enterprise E1 plan. The company wants to filter email messages based on the following criteria: - Reverse DNS lookup - Sender open proxy test - HELO/EHLO analysis - Analysis of spam confidence level (SCL) ratings on email messages from a specific sender You need to filter all email messages. How should you complete the relevant Windows PowerShell script? To answer, select the appropriate command segment from each list in the answer area.

Answer:
