[2017-Aug.-Updated100% Success-Braindump2go 300-175 VCE Dumps and 300-175 PDF Dumps 255Q Instant Download[111-121

[Full Version!]2017 August New Updated 300-175 Exam Dumps with PDF and VCE Free Share! Following are some new 300-175 questions: 1.|2017 New 300-175 Exam Dumps (PDF & VCE) 255Q&As Download:https://www.braindump2go.com/300-175.html 2.|2017 New 300-175 Exam Questions & Answers Download: https://drive.google.com/drive/folders/0B75b5xYLjSSNZjVxdkhhREFxblU?usp=sharing QUESTION 111Which consideration must be made while performing backup operations within the Cisco UCS Manager? A.   Each backup destination can have multiple backup operations.B.   Backups can be scheduled ahead of time.C.   A user can perform incremental backups of a system configuration.D.   Rerunning an existing backup operation overwrites the existing backup file. Answer: D QUESTION 112Which four Cisco UCS components use the Cisco NX-OS syslog services to generate syslog entries for system information and alerts? (Choose four.) A.   I/O moduleB.   fabric interconnectC.   chassisD.   Cisco Integrated Management ControllerE.   Cisco UCS ManagerF.   adapterG.   Ethernet uplinkH.   storage module Answer: ADEF QUESTION 113Which scheduling option sets the number of tasks that can be run? A.   max number of concurrent tasksB.   max changesC.   max number of tasksD.   max configuration requests Answer: C QUESTION 114Which two statements about Call Home are true? (Choose two.) A.   The virtual IP address of the Cisco UCS Manager in a cluster is the source of the email.B.   In a cluster configuration, at least one fabric interconnect must have IP connectivity.C.   The fabric interconnect must have IP connectivity to email server or the destination HTTP serverD.   At least one destination profile must be configured.E.   Call Home requires SCP to transfer the files securely. Answer: CD QUESTION 115Which four physical connections on a fabric interconnect are needed to perform the initial system setup for a cluster configuration? (Choose four.) A.   Ethernet uplink ports connected to upstream switchB.   console port connected to a computer terminal or console server.C.   Layer 1 ports on both fabric interconnects connected to each otherD.   Layer 1 port of the first fabric interconnect connected to Layer 2 port of the second fabric interconnectE.   Layer 2 ports on both fabric interconnects connected to each otherF.   Fibre Channel uplink ports connected to upstream fabric switchG.   management Ethernet port (mgmt0) connected to external switch or routerH.   port channel to each fabric interconnect Answer: BCEG QUESTION 116 Which statement about the purpose of a storage connection policy in Cisco UCS Manager is true? A.   It sets a minimum baseline of requirements for when vHBAs are configured in a service profile.B.   It defines how zoning is configured for initiators and targets on the fabric interconnect.C.   It sets a minimum baseline of requirements for when storage devices connect to the fabric interconnects.D.   It defines the number of storage connections that are allowed to connect to the fabric interconnects. Answer: B QUESTION 117Which policy determines what happens to local disks when they are disassociated from a service profile? A.   maintenance policyB.   local disk policyC.   scrub policyD.   BIOS policy Answer: C QUESTION 118Which policy is used to specify how Cisco UCS Manager should proceed for configuration changes that will have a service impact? A.   host firmware policyB.   maintenance policyC.   local disk policyD.   BIOS policy Answer: B QUESTION 119After an admin configures a service profile template and associates it to the blade, the admin notices that changes to the template are not automatically pushed to profiles that are inheriting that template. The service profile template and vNIC templates are set to "initial". Which two actions resolve this issue? (Choose two.) A.   Delete the service profile template and re-create it as an updating template.B.   Change the type of the service profile template from "initial" to "updating".C.   Delete the vNIC template and re-create it as an updating template.D.   Change the type of the vNIC template from "initial" to "updating".E.   Delete and recreate all templates. Answer: AD QUESTION 120Which consideration must be made while utilizing the UEFI boot mode? A.   Legacy boot modes cannot be used on the same server.B.   This mode applies only to models before the M3.C.   The service profile cannot be disassociated without decommissioning the blade.D.   This mode replaces the UEFI shell typically available as a boot fallback. Answer: A QUESTION 121Which boot option must be present in the boot policy to have the option to manually boot from the FlexFlash Secure Digital card? A.   any configurationB.   FlexFlash stateC.   local diskD.   remote virtual drive Answer: C !!!RECOMMEND!!! 1.|2017 New 300-175 Exam Dumps (PDF & VCE) 255Q&As Download:https://www.braindump2go.com/300-175.html 2.|2017 New 300-175 Study Guide Video: YouTube Video: YouTube.com/watch?v=zm6ho1Bw02E
