Git config credential.help cacheAnswer: BQUESTION 356An administrator is configuring a new Linux server and wants to boot the system to a file that was previously downloaded to locally install removable media. Which of the following boot options should the administrator choose?A. PXEB.   ISOC.   NFSD.   HTTPAnswer: BQUESTION 357A lab virtual image is always named pc21.local and in variety of testing situation. The administrator wants to use the IP address pc21.local in a script but is concerned it may change from day to day, as the image is rebuilt fairly often.Which of the following should the administrator add to a script to ensure the IP address is always accurate?A.   MYIP =$(dig pc21.local +shortB.   MYIP =$(dig pc21.local +norecurse +nocomments)C.   MYIP =$(dig pc21.local + answer + mostatusD.   MYIP =$(dig pc21.local +authority)Answer: BQUESTION 358A Linux server hosts Kerberos and LDAP, which of the following is the MOST likely role of this server?A.   Certificate authorityB.   ClusteringC.   DatabaseD. AuthenticationAnswer: DQUESTION 359A technician reviews the following output:

```
Device     Boot  Start        End          Sectors     Size  Id  Type
/dev/sda1   *     2048         121634815    121632768   580   83  Linux
/dev/sda2         121636862    125827071    4190210     20    5   Extende
/dev/...          ...          ...          ...

         total    used    free    shared  buff/cache  available
mem:     2052060  1545312 66676   33508   440072      305308
Swap:    0        0       0
```

Which of the following commands should the technical execute to ensure the system has the appropriate paging? (Select TWO.)A. dd if=dev/sda5 of=/tmp bs=512B.   swapon /dev/sda5C.   Mkswap/dev/sda5D.   Mkfs,ext3 /dev/sda5E.   Lostat/dev/sda 5F.   Free ?/dev/sdaAnswer: BCQUESTION 360Users are receiving permission-denied messages when trying to access a spreadsheet file within the company's filesystem. A Linux administrator receives a ticket and begin to investigate the following output:

```
COMMAND  PID  USER    FD
init     1            
www.Br
init     1    root    tx
```

Which of the following command would produce the presented output?A.   TopB.   niceC.   grepD.   isofAnswer: DQUESTION 361A Linux administrator needs to run a few virtual machines and containers on the physical machines with a single network interface. Which of the following networking would allow the administrator to connect with the outside world?A.   BridgingB.   VLANC.   Bonding/teamingD.   VPNAnswer: AQUESTION 362An administrator is logged on as an unprivileged user and needs to compile and installed an application from source. Which of the following BEST represents how to complete this task?A.   cd <source>; sudo ./configure $$ make $$ make installB.   cd <source>; ./configure $$ sudo make $$ make installC.   cd <source>; ./configure $$ make $$ make installD.   cd <source>; ./configure $$ make $$ make installAnswer: AQUESTION 363A system administrator is investigating why user3 cannot log in using SSH to one of the servers.An attempt to log in results in the following:

Which of the following commands should the systems administrator execute to allow user3 log in to the server?A.   Restorecon /bin/rsshB.   Passwd/-u user3C.   Usermod/ -s /bin/sh user3D.   Setfac1/ bin/rsshAnswer: AQUESTION 364An administrator wants to be able to access a remote server. After creating an SSH key pair, which of the following describes where the public key should be placed to allow for key-based authentication?A.   -/, ssh/authorized_keysB.   -/ssh/id_ras.pubC.   -/.ssh/known_hostsD. -/.ssh/configAnswer: AQUESTION 365Joe, a system administrator, realizes that the time zone on a system is different than his local time zone. Joe runs the command export Tz-America .Chicago to resolve this. However the next Joe logs in, Joe notices the issue has returned. Which of the following is the BEST way for Joe to fix this issue so the solution persists across logins?A.   Run the export Tz=/etc/localtime commandB.   Set the correct the zone with the date command.C.   Add the export Tz=America/Chicage command to the bash_profile file.D.   Run the export LC ALL=America/Chicago commandAnswer: CQUESTION 367A Linux administrator issues the following command with root or sudo privileges:Rmp -1 installpackage.rpm -nodepsWhich of the following should the administrator expect to see in the output?A.   The installpackage.rmp package will not fail due to checks for dependencies.B.   The installpackage.rmp package will not fail due to missing dependenciesC.   The installpackage.rmp package will not be installed, and there will be dependenciesD.   The installpackage.rmp package will not be installed, and there not be check for dependenciesAnswer: AQUESTION 368A Linux administrator execute the following steps in this order:1. Changes some software code2. Commits the changes to the Git repository3. Triggers a job to compile4. Execute some test scripts5. Packages the software package6. Publishes the software packages to a package repositoryWhich of the following orchestration processes is the administrator using?A.   Build automationB.   Deployment automationC.   Test automationD.   Infrastructure automationAnswer: CQUESTION 369A system administrator is troubleshooting a web server that runs in a container. After the log is retained, the container occasionally stops logging to a log file. Fortunately, the vendor provides a custom signal that allows the application to reconnect to the log file.Which of the following would be BEST for the administrator to run the containers?A.   Kill ­HUP 1B.   Kill ­USR 1C.   Kill ­TEAM 1D.   Kill ­Kill 1Answer: AQUESTION 370A junior administrator issues the following commands on a Linux server:

The next day, the junior administrator is unable to edit the file. Which of the following would resolve this issue?A.   Chmod 666 /home/junior_admin/tasklistB.   Chmod $+x /home/junior_admin/tasklistC.   Chmod g+s /home/junior_admin/tasklistD.   Chmod o+rwx /home/junior_admin/tasklistAnswer: AQUESTION 371An administrator wants to add a user named comptia to the system administrators group. Which of the following commands will accomplish this task?A.   Usermod ­sG wheel comptiaB.   Useradd -sG wheel comptiaC.   visudo -sG wheel comptiaD.   sudo -sG wheel comptiaAnswer: BQUESTION 372Which of the following commands should a system administrator use to configure a passwordless login to remote system? (Select TWO.)A.   Cp B.   Ssh-agentC.   Ssh-copy-idD.   Ssh-keygenE.   Ssh-addF.   opensslAnswer: BCQUESTION 373A new packages repository named repo10 has been installed on mirror site. A Linux administrator wants to use this new repository for local package installations. In which of the following locations should the administrator store the configuration information for the repo10 repository?A.   /etc/yum.reps.d/repo10.RepoB.   /etc/yum_repo.d/repo10C.   /etc/yum.reps.d/repo10D.   /etc/yum.confAnswer: AResources From:1.2022 Latest Braindump2go XK0-004 Exam Dumps (PDF & VCE) Free Share: https://www.braindump2go.com/xk0-004.html2.2022 Latest Braindump2go XK0-004 PDF and XK0-004 VCE Dumps Free Share: https://drive.google.com/drive/folders/1CKa6jPAj_xZJUOpQDpD2r-JcM3pUDVpP?usp=sharing3.2021 Free Braindump2go
