

## Latest Braindump2go Microsoft 70-413 Certification PDF Dumps With 100 Percent Guarantee Pass (115-124)

**QUESTION 115**Your network contains an Active Directory domain named contoso.com. All client computers run either Windows 7 or Windows 8. Some users work from customer locations, hotels, and remote sites. The remote sites often have firewalls that limit connectivity to the Internet. You need to recommend a VPN solution for the users. Which protocol should you include in the recommendation? A. L2TP/IPSec B. PPTP C. IKEv2 D. SSTP  
Answer: D

**QUESTION 116**Your network contains an Active Directory domain named contoso.com. Your company has 100 users in the sales department. Each sales user has a domain-joined laptop computer that runs either Windows 7 or Windows 8. The sales users rarely travel to the company's offices to connect directly to the corporate network. You need to recommend a solution to ensure that you can manage the sales users' laptop computers when the users are working remotely. What solution should you include in the recommendation? A. Deploy a Microsoft System Center 2012 Service Manager infrastructure. B. Deploy the Remote Access server role on a server on the internal network. C. Deploy the Network Policy and Access Services server role on a server on the internal network. D. Deploy a Microsoft System Center 2012 Operations Manager infrastructure.  
Answer: B

**QUESTION 117**Your network contains an Active Directory forest named contoso.com. The forest contains five domains. You need to ensure that the CountryCode attribute is replicated to the global catalog. What should you do? A. Modify the configuration partition. B. Create and modify an application partition. C. Modify the schema partition. D. Modify the domain partitions.  
Answer: C

**QUESTION 118**Your network contains an Active Directory domain named contoso.com. All servers run Windows Server 2008 R2. All domain controllers are installed on physical servers. The network contains several Hyper-V hosts. The network contains a Microsoft System Center 2012 infrastructure. You plan to use domain controller cloning to deploy several domain controllers that will run Windows Server 2012. You need to recommend which changes must be made to the network infrastructure before you can use domain controller cloning. What should you recommend? A. Upgrade the domain controller that has the infrastructure master operations master role to Windows Server 2012. Install the Windows Deployment Services server role on a server that runs Windows Server 2012. B. Upgrade the domain controller that has the PDC emulator operations master role to Windows Server 2012. Deploy a Hyper-V host that runs Windows Server 2012. C. Upgrade a global catalog server to Windows Server 2012. Install the Windows Deployment Services server role on a server that runs Windows Server 2012. D. Upgrade a global catalog server to Windows Server 2012. Deploy Virtual Machine Manager (VMM).  
Answer: B

**QUESTION 119**Your network contains 50 servers that run Windows Server 2003 and 50 servers that run Windows Server 2008. You plan to implement Windows Server 2012 R2. You need to create a report that includes the following information: The servers that run applications and services that can be moved to Windows Server 2012 R2 The servers that have hardware that can run Windows Server 2012 R2 The servers that are suitable to be converted to virtual machines hosted on Hyper-V hosts that run Windows Server 2012 R2  
Solution: You install Windows Server 2012 R2 on a new server, and then you run Microsoft Deployment Toolkit (MDT) 2012. Does this meet the goal? A. Yes B. No  
Answer: B

**QUESTION 120**Your network contains 50 servers that run Windows Server 2003 and 50 servers that run Windows Server 2008. You plan to implement Windows Server 2012 R2. You need to create a report that includes the following information: The servers that run applications and services that can be moved to Windows Server 2012 R2 The servers that have hardware that can run Windows Server 2012 R2 The servers that are suitable to be converted to virtual machines hosted on Hyper-V hosts that run Windows Server 2012 R2  
Solution: You install Windows Server 2012 R2 on a new server, and then you run the Windows Server Migration Tools. Does this meet the goal? A. Yes B. No  
Answer: B

**QUESTION 121**Your network contains an Active Directory domain named contoso.com. The domain contains multiple sites. You plan to deploy DirectAccess. The network security policy states that when client computers connect to the corporate network from the Internet, all of the traffic destined for the Internet must be routed through the corporate network. You need to recommend a solution for the planned DirectAccess deployment that meets the security policy requirement  
Solution: You set the ISATAP State to state disabled. Does this meet the goal? A. Yes B. No  
Answer: B

**QUESTION 122**Your network contains an Active Directory domain named contoso.com. The domain contains multiple sites. You plan to deploy DirectAccess. The network security policy states that when client computers connect to the corporate network from the Internet, all of the traffic destined for the Internet must be routed through the corporate network. You need to recommend a solution for the planned DirectAccess deployment that meets the security policy requirement.  
Solution: You enable split tunneling. Does this meet the goal? A. Yes B. No  
Answer: B

**QUESTION 123**Your network contains an Active Directory domain named contoso.com. The domain contains three VLANs. The VLANs are configured as shown in the following table.

| VLAN   | Contents  | Routing enabled to      |
|--------|---|-------------------------|
| VLAN 1 | Client computers  | VLAN 2                  |
| VLAN 2 | <ul style="list-style-type: none"><li>• Application servers</li><li>• Domain controllers</li><li>• Network Policy Service (NPS) servers</li></ul> | VLAN 1 and the Internet |
| VLAN 3 | Windows Server Update Services (WSUS) server  | Nowhere                 |

All client computers run either Windows 7 or Windows 8. Goal: You need to implement a solution to ensure that only the client computers that have all of the required security updates installed can connect to VLAN 1. The solution must ensure that all other client computers connect to VLAN 3. Solution: You implement the 802.1x Network Access Protection (NAP) enforcement method. Does this meet the goal? A. Yes B. No Answer: A QUESTION 124 Your network contains an Active Directory domain named contoso.com. The domain contains three VLANs. The VLANs are configured as shown in the following table.

| VLAN ID | Contents  |
|---------|---|
| 1       | Client computers  |
| 2       | <ul style="list-style-type: none"><li>• Application servers</li><li>• Domain controllers</li><li>• Network Policy Service (NPS)</li></ul> |
| 3       | Windows Server Update Service   |

All client computers run either Windows 7 or Windows 8. The corporate security policy states that all of the client computers must have the latest security updates installed. You need to implement a solution to ensure that only the client computers that have all of the required security updates installed can connect to VLAN 1. The solution must ensure that all other client computers connect to VLAN 3. Solution: You implement the VPN enforcement method. Does this meet the goal? A. Yes B. No Answer: B Passing Microsoft 70-413 Exam successfully in a short time! Just using Braindump2go's Latest Microsoft 70-413 Dump <http://www.braindump2go.com/70-413.html>
