QUESTION 65
Case Study 2 - A. Datum
Overview
Existing Environment
This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study
To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.
Current Infrastructure
A . Datum recently purchased a Microsoft 365 subscription. All user files are migrated to Microsoft 365. All mailboxes are hosted in Microsoft 365. The users in each office have email suffixes that include the country of the user, for example, user1@us.adatum.com or user2#uk.adatum.com. Each office has a security information and event management (SIEM) appliance. The appliances come from three different vendors. A. Datum uses and processes Personally Identifiable Information (PII).
Problem Statements
Requirements
A. Datum entered into litigation. The legal department must place a hold on all the documents of a user named User1 that are in Microsoft 365.
Business Goals
A. Datum wants to be fully compliant with all the relevant data privacy laws in the regions where it operates. A. Datum wants to minimize the cost of hardware and software whenever possible.
Technical Requirements
A. Datum identifies the following technical requirements:
- Centrally perform log analysis for all offices.
- Aggregate all data from the SIEM appliances to a central cloud repository for later analysis.
- Ensure that a SharePoint administrator can identify who accessed a specific file stored in a document library.
- Provide the users in the finance department with access to Service assurance information in Microsoft Office 365.
- Ensure that documents and email messages containing the PII data of European Union (EU) citizens are preserved for 10 years.
- If a user attempts to download 1,000 or more files from Microsoft SharePoint Online within 30 minutes, notify a security administrator and suspend the user's user account.
- A security administrator requires a report that shows which Microsoft 365 users signed in. Based on the report, the security administrator will create a policy to require multi-factor authentication when a sign in is high risk.
- Ensure that the users in the New York office can only send email messages that contain sensitive U.S. PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive U.S. PII data.
Hotspot Question
You need to meet the technical requirement for the SharePoint administrator. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point. Answer: Explanation:

PII data to other New York office users. Email messages must be monitored to ensure compliance. Auditors in the New York office must have access to reports that show the sent and received email messages containing sensitive U.S. PII data. You need to protect the U.S. PII data to meet the technical requirements. What should you create? A. a data loss prevention (DLP) policy that contains a domain exception B. a

Security & Compliance retention policy that detects content containing sensitive dataC. a Security & Compliance alert policy that contains an activityD. a data loss prevention (DLP) policy that contains a user overrideAnswer: CExplanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/create-activity-alerts>QUESTION 68Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You are deploying Microsoft Intune.You successfully enroll Windows 10 devices in Intune.When you try to enroll an iOS device in Intune, you get an error.You need to ensure that you can enroll the iOS device in Intune.Solution: You add your user account as a device enrollment manager.Does this meet the goal?A. YesB. NoAnswer: BQUESTION 69Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).You configure pilot co-management.You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.Solution: You add Device1 to an Active Directory group.Does this meet the goal?A. YesB. NoAnswer: AExplanation:

<https://www.scconfigmgr.com/2017/11/30/how-to-setup-co-management-part-6/>QUESTION 70Your company has a Microsoft 365 subscription.You implement Microsoft Azure Information Protection.You need to automatically protect email messages that contain the word Confidential in the subject line.What should you create?A. a mail flow rule from the Exchange admin centerB. a message trace from the Security & Compliance admin centerC. a supervision policy from the Security & Compliance admin centerD. a sharing policy from the Exchange admin centerAnswer: AExplanation:

<https://docs.microsoft.com/en-us/azure/information-protection/configure-exo-rules>QUESTION 71You have a Microsoft 365 subscription.You need to investigate user activity in Microsoft 365, including from where users signed in, which applications were used, and increases in activity during the past month. The solution must minimize administrative effort.Which admin center should you use?A. Azure ATPB. Security & ComplianceC. Cloud App SecurityD. FlowAnswer: BExplanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance>QUESTION 72You are testing a data loss prevention (DLP) policy to protect the sharing of credit card information with external users.During testing, you discover that a user can share credit card information with external users by using email. However, the user is prevented from sharing files that contain credit card information by using Microsoft SharePoint Online.You need to prevent the user from sharing the credit card information by using email and SharePoint.What should you configure?A. the locations of the DLP policyB. the user overrides of the DLP policy ruleC. the status of the DLP policyD. the conditions of the DLP policy ruleAnswer: AExplanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>QUESTION 73You have a Microsoft 365 subscription.You need to view the IP address from which a user synced a Microsoft SharePoint library.What should you do?A. From the SharePoint admin center, view the usage reports.B. From the Security & Compliance admin center, perform an audit log search.C. From the Microsoft 365 admin center, view the usage reports.D. From the Microsoft 365 admin center, view the properties of the user's user account.Answer: BExplanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance>QUESTION 74You plan to use the Security & Compliance admin center to import several PST files into Microsoft 365 mailboxes.Which three actions should you perform before you import the data? Each correct answer presents part of the solution.NOTE: Each correct selection is worth one point.A. From the Exchange admin center, create a public folder.B. Copy the PST files by using AzCopy.C. From the Exchange admin center, assign admin roles.D. From the Microsoft Azure portal, create a storage account that has a blob container.E. From the Microsoft 365 admin center, deploy an add-in.F. Create a mapping file that uses the CSV file format.Answer: BCFExplanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/use-network-upload-to-import-pst-files>QUESTION 75You deploy Microsoft Azure Information Protection.You need to ensure that a security administrator named SecAdmin1 can always read and inspect data protected by Azure Rights Management (Azure RMS).What should you do?A. From the Security & Compliance admin center, add User1 to the eDiscovery Manager role group.B. From the Azure Active Directory admin center, add User1 to the Security Reader role group.C. From the Security & Compliance admin center, add User1 to the Compliance Administrator role group.D. From Windows PowerShell, enable the super user feature and assign the role to SecAdmin1.Answer: DExplanation:
