

## Microsoft 70-491 Exam Dumps From Brindump2go Covers The Latest Knowledge Points From Microsoft Exam Centre(1-6)

QUESTION 1 You plan to develop several Windows Store apps. You plan to use a CheckBox control in all of the apps. The CheckBox control will use a custom visual display. You create XAML markup to customize the control. The code contains all of the necessary visual components for the control, including elements named checkedGlyph and indeterminateGlyph. You need to ensure that the check box meets the following requirements:- If a value for the check box was NOT set, the check box must display indeterminateGlyph. - When the check box is selected, the check box must display checkedGlyph. - If the check box is cleared, the check box must NOT display any glyphs. You have the following XAML markup:

```
<Target 1 Target 2="CheckBox"
x:Key="myCheckbox">
<Border BorderBrush="{TemplateBinding BorderBrush}"
BorderThickness="{TemplateBinding BorderThi
Background="{TemplateBinding Background}">
<VisualStateManager.VisualStateGroups>
<VisualStateGroup x:Name="CheckStates">
<VisualState x:Name="Target 3">
<Storyboard>
<DoubleAnimation Duration="0" To="1"
Storyboard.TargetProperty="Opacity"
Storyboard.TargetName="checkGly
</VisualState>
</VisualState>
<VisualState x:Name="Target 4"/>
<VisualState x:Name="Target 5">
<Storyboard>
<DoubleAnimation Duration="0" To="1"
Storyboard.TargetProperty="Opacity"
Storyboard.TargetName="indeterminate
</Storyboard>
</VisualState>
</VisualStateGroup>
...
</Target 6>
```

Which code snippets should you insert in Target 1, Target 2, Target 3, Target 4, Target 5 and Target 6 to complete the XAML markup? (To answer, select the correct code snippet from each drop-down list in the answer area.)

Answer Area	
Target 1:	<input type="text"/> ControlTemplate CustomControl
Target 2:	<input type="text"/> ControlName TargetType
Target 3:	<input type="text"/> Checked Indeterminate Unchecked
Target 4:	<input type="text"/> Checked Indeterminate Unchecked
Target 5:	<input type="text"/> Checked Indeterminate Unchecked
Target 6:	<input type="text"/> ControlTemplate CustomControl

Answer:

Answer Area

Target 1:   
ControlTemplate  
CustomControl

Target 2:   
ControlName  
TargetType

Target 3:   
Checked  
Indeterminate  
Unchecked

Target 4:   
Checked  
Indeterminate  
Unchecked

Target 5:   
Checked  
Indeterminate  
Unchecked

Target 6:   
ControlTemplate  
CustomControl

QUESTION 2 You are developing a Windows Store app that will display a toast notification. You need to ensure that when a toast notification is displayed, the first line of the notification is bold. Which template should you use? A. TileSquareText03B. ToastText01C. TileSquarePeekImageAndText01D. ToastImageAndText02

QUESTION 3 You plan to create a custom panel that displays a pie chart. Each value of the pie chart will have a control. You need to register a custom dependency property to the panel. Which code segment should you use?

Answer Area

Target 1:   
ControlTemplate  
CustomControl

Target 2:   
ControlName  
TargetType

Target 3:   
Checked  
Indeterminate  
Unchecked

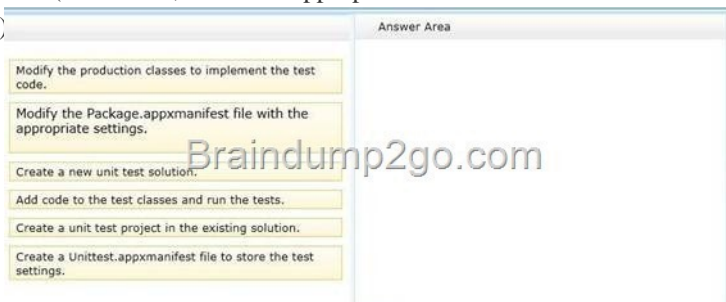

Target 4:   
Checked  
Indeterminate  
Unchecked

Target 5:   
Checked  
Indeterminate  
Unchecked

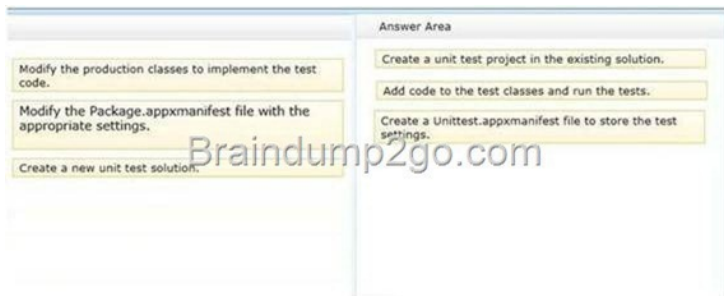

Target 6:   
ControlTemplate  
CustomControl

] A. Option AB. Option BC. Option CD. Option D Answer: CE Explanation:

<http://msdn.microsoft.com/en-us/library/windows/apps/windows.ui.xaml.dependencyproperty.aspx> QUESTION 4 You are developing a Windows Store app. You need to create and run unit tests for the app. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

Explanation: <http://msdn.microsoft.com/en-us/library/windows/apps/ms182532.aspx> QUESTION 5 You are developing a Windows Store app that will provide users with the ability to subscribe to content by using in-app purchases. You need to test the in-app purchase functionality of the app before you deploy the app to the Windows Store. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Modify the Package.appxmanifest file. B. Use the CurrentAppSimulator class. C. Modify the App.xaml file. D. Modify the Windowsstoreproxy.xml file. E. Use the CurrentApp class. Answer: BE

QUESTION 6 You are developing a Windows Store app that will provide users with the ability to create photos by using the hardware on a device. Once the users create the photos, they can save the photos to the Pictures library. If the users sign in by using a Microsoft account, they can grant other users remote access to the photos. You need to identify which capabilities must be enabled for the app. Which three capabilities should you identify? (Each correct answer presents part of the solution. Choose three.) A. Webcam B. Pictures Library C. Proximity D. Internet (Client & Server) E. Private Networks (Client & Server) F. Enterprise Authentication Answer: ABDE

Explanation: A: The webcam capability provides access to the webcam's video feed, which allows the app to capture snapshots and movies from a connected webcam. B: The picturesLibrary capability provides programmatic access to the user's Pictures, allowing the app to enumerate and access all files in the library without user interaction. This capability is typically used in photo playback apps that need to access the entire Pictures library. D: Internet and public networks The internetClient capability provides outbound access to the Internet and public networks through the firewall. Almost all web apps use this capability. The internetClientServer capability provides inbound and outbound access to the Internet and public networks through the firewall. <http://msdn.microsoft.com/en-us/library/windows/apps/hh464936.aspx> Braindump2go New Released Microsoft 70-491 Dumps PDF Free Download: <http://www.braindump2go.com/70-491.html>
