QUESTION 4A company uses SharePoint2016 in a hybrid environment. You replace an administrator that has left the company.A vendor notifies you that the SSL certificate that you purchased from the vendor is expired. The hybrid environment is not able to authenticate domain users that attempt to access it. When accessing the online environment by using a cloud user account, you observe that Search is not returning results from the entire farm.You need to locate the expired certificates and renew them. What should you do? To answer, select the appropriate certificate type of location from each list in the answer area. Note: Each correct selection is worth one point.

Issue

Domain users are unable to access online resources.

SharePoint Online search queries are not returning expected results.

Certificate type

- STS certificate
- wildcard SSL certificate
- secure channel certificate

Location

- Office 365 tenant
- reverse proxy server
- federation server
- domain controller

Answer:

QUESTION 5 You are a SharePoint administrator for Contoso, Ltd. You manage a large SharePoint Server farm. You configure a single SharePoint Search application for the farm. The Search Service application has five crawl databases. All crawl databases have content. Contoso would like to crawl content from a partner company named WingTip Toys. This crawled content must be stored in a dedicated crawl database. You need to configure the environment. What should you do? A. Provision a new Search Server for the existing Search Service application. Add dedicated crawl components for WingTip Toys to the new Search Server. B. Create a dedicated Microsoft SQL Server instance for the WingTip crawl database. C. Add a crawl database to the existing Search Service application. D. Provision a new Search Service application. Configure the Search Service application to crawl WingTip Toys content. Answer: C

QUESTION 6 In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section you will NOT be able to return to it. As a result these questions will not appear in the review screen. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution. You must store all personal sites in Office 365. You create App Management service, Managed Metadata service, and User Profile service applications. You create a web application and site collection for the My Site Host. You grant users the Create Personal Site and Follow People and Edit Profile permissions. Then, you create an audience for the users that will be redirected to Office 365. In the SharePoint Central Administration, you configure hybrid OneDrive for Business settings. Does this solution meet the goal? A. Yes B. No Answer: A

QUESTION 7 In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution. You must store all personal sites in Office 365. You create and configure a User Profile service application and deploy an App Management service application. You deploy a My Site host collection. In SharePoint Central Administration, you create an audience. On the Configure hybrid OneDrive for Business settings page, you enter a value for the My Site URL field and specify the audience. Does this solution meet the goal? A. Yes B. No Answer: B

QUESTION 8 In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution. You must store all personal sites in Office 365. You configure the Managed Metadata service and User Profile service applications. You create a My Site Host site collection. In SharePoint Central Administration, you grant the Create Personal Site and Follow People and Edit Profile permissions to users and configure hybrid OneDrive for Business settings. Does the solution meet the goal? A. Yes B. No Answer: B

QUESTION 9 In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You are the SharePoint administrator for a company.
